

6/7/68

Dear Hal,

In his interview with Hall that is on paper, and much of it is not, Garrison's transcript shows that Hall seemed to know Youngblood in connection with Cuban activities well after the period covered in the book. This would seem to make even more interesting what Joel Palmer suspects and anything we can get from the court records.

I have recently sent Paul some things I asked him to mention to no one but you and then only in person. I want them to go no further. If they do it can jeopardize what I am working on.

I do take some encouragement from these developments.

A representative of one of the most respected European publications was to see me yesterday.

Best to the Sanderses.

Sincerely,
